Panel construction

- A Hot-dipped galvanized uniform woodgrain steel walls**
26-ga exterior steel skin. Baked-on polyester paint (can be repainted), same quality of corrosion-resistant steel for interior and exterior faces. Regardless of the color chosen, the inside is always White (door and window frames).
- B 2" CFC-free continuous sculpted polystyrene board**
Bonded between steel faces with polyurethane reactive hot melt glue to ensure a thermal-resistance rating of R-8.7 (RSI 1.7 or k=0.588 W/m²K).
- C Tongue & groove section joints**
Provide seamless fit and improved rigidity.
- D 20-ga Center stiles**
Hot-dipped galvanized steel plates running the full height of the section are attached to the interior face to provide added rigidity and are also pre-punched with extruded holes for hinge attachment.
- E U-Shaped bottom weatherstripping**
Continuous astragal made of U-shaped flexible vinyl and held in place by an aluminum retainer (black PVC retainer optional).
