

S-24 | SN-24 | S-24C

Mid-America Series

2 LAYERS OR 1 LAYER
STEEL PAN DOOR

DEEP GROOVES
THICKNESS 2"

POLYSTYRENE + VINYL BACKING (R-5.4 OR R-6.6) OR NON-INSULATED

12' x 14', White doors

FEATURES AND BENEFITS

A DEEP-GROOVED STEEL WALL

- Providing more **strength** and **additional bending resistance**, our sections are made with 1/2" deep and 2" wide horizontal grooves with alternating smaller grooves.

B OPTIONAL POLYSTYRENE INSULATION

- For energy savings, polystyrene insulation protected with a vinyl backing is available.

C SECTION PROFILE

- Rails are hemmed the entire length of the section for added **sturdiness** and **dependability**.

D CENTER AND END STILES

- With a fully hemmed edge for added **strength** and **safety**, all stiles are pre-punched with extruded holes for secure attachment of hinges and hardware components.

PANEL CONSTRUCTION

1 Hot-dipped galvanized steel wall

- Baked-on polyester paint. Can be repainted
- Corrosion resistant

	S-24	SN-24	S-24C
Exterior steel skin	24-gauge	25-gauge	24-gauge
Exterior side finish	Smooth	Smooth	Woodgrain

2 2" (50 mm) door

- Optional CFC-free **polystyrene insulation covered with a vinyl backing** ensuring a thermal-resistance rating of **R-5.4** (RSI 1.0 or k=1.000 W/m²K) for S-24 and SN-24 and R-6.6 (RSI 1.2 or k=0.860 W/m²K) for S-24C.

3 Sections are made with 1/2" (13 mm) deep and 2" (50 mm) wide grooves providing more strength to the door.

4 Tongue & groove joints between sections that fit seamlessly.

5 Bottom weatherstripping

S-24 and SN-24: continuous astragal made of U-shaped flexible vinyl and held in place by an aluminum retainer.

S-24C: continuous, flexible, semi-circular, U-Shape PVC.

6 Vertical center stiles

S-24 and SN-24: 18-gauge galvanized steel provides a rock solid base and the pre-punched holes help to affix hinges and struts. One edge is hemmed to add more strength to the section.

S-24C: 20-gauge galvanized steel attached by a Tog-L-Loc[®] joining system, with no welding and rivets, at hinge placement locations.
